## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election with traverse of the claims of Group I (claims 1-24) in Paper No. 9 is acknowledged. Claims 25- 43 have been withdrawn from consideration at this time.

2. Upon further examination of the remaining elected claims in the case, the following patentably distinct species of the claimed invention have been identified:

**Species 1**; wherein said local area is a circular area; claims 10, 14, 15, 19, 23 and 24.

**Species 2**; wherein said local area is a political area; claims 11 and 20.

**Species 3**; wherein said local area is a zip-code area; claims 12 and 21.

**Species 4**; wherein said local area is a square area; claims 13 and 22.

**Species 5**; comprising specifying the physical location associated with said user web-site by said user; claims 4-6.

**Species 6**; wherein the user's computer or second computer is coupled to the internet via a telephone connection and the local area is based on the location of the telephone connection; claim 8.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 16 is generic to the method claims 1-16 and claim 17 is generic to the systems claims 17-24.

Art Unit: 2164

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. A telephone call was made to Shawn O'Dowd on 3/28/01 to request an oral election in regard to the initial restriction but did not result in an election being made at that time due to a need for consultation with the inventors. This election of species requirement has been mailed out to allow for a similar consultation with the inventors.

Art Unit: 2164

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
